

# TT327

## Labels for Life.

**Face Stock:** 3.5 mil matte clear vinyl offers excellent resistance to moisture. The material is highly conformable and is used for self-laminating wire and cable identification labels.

**Adhesive:** 0.9 mil high performance permanent acrylic adhesive offering excellent flexibility and resistance to moisture.

**Release Liner:** 50# kraft liner designed to offer excellent performance for manual application.

## Matte Clear Vinyl Film

TT327 is a highly conformable vinyl with excellent durability designed for use in self-laminating wire and cable identification labels. When used in combination with the recommended IDENTCO thermal transfer ribbon and the self-laminating feature this material provides a highly durable wire and cable marker, with excellent legend permanence. This material has been tested at an independent testing facility to the automotive flame specification FMVSS 302. In both wrapping and flagging application on small diameter PVC coated wire, this material passed the FMVSS 302 test.

## Typical Applications

Self-laminating wire  
and cable marking

## Typical Industry Sectors

Automotive  
Electronics  
Industrial
