

# TT600

## Labels for Life.

**Face Stock:** 2.3 mil topcoated gloss white polypropylene offers excellent resistance to harsh chemicals, scratches, smudges and abrasion. The material is rigid and specifically designed to not shrink. It is ideal for marking electronic components where the heat requirement of polyester is not required.

**Adhesive:** 0.9 mil high performance emulsion acrylic adhesive offering excellent chemical and abrasion resistance.

**Release Liner:** 50# kraft liner designed to offer excellent performance for automatic application.

## Thermal Transfer Gloss White Polypropylene Film

## Typical Applications

- Rating Plates
- Nameplates
- Industrial Barcodes

## Typical Industry Sectors

- Automotive
- Electronics
- Industrial
