

January 30, 2026  
IDENTCO  
Ingleside, IL 60041

Dear Valued Customer,

This letter addresses the regulatory status of IDENTCO and the current industry concerns on eliminating per- and polyfluorinated chemicals called PFAS.

According to all of our suppliers, Per- and Polyfluorinated Substances (PFAS), including Perfluorooctane sulfonic acid (PFOS) and Perfluorooctanoic acid (PFOA), are not intentionally added as ingredients to the manufacturing of the products we provide to you.

Therefore, none of the products we supply to you are expected to be present in the final composition. PFAS substances have widespread industrial use and are ubiquitous in the environment. If these substances are present, they likely would be present only at a trace level. Because we do not routinely analyze our products for these substances or total organic fluorine, we cannot categorically state that the materials are free from these substances.

We believe this information is accurate and is offered in good faith. This information is subject to revision when additional knowledge/information is gained.

Sincerely,

*Kari Greason*
